Infrachain Challenge pushes application development for the Public Sector Blockchain

Infrachain, the Luxembourg-based Blockchain association launched under the Digital Luxembourg initiative, announces the launch of the 1st edition of the Infrachain Challenge. The Infrachain Challenge is a hackathon focused on Blockchain. It is organized by Infrachain in collaboration with EY and with the support of the Ministry for Digitalisation. The Challenge takes place at The LHoFT (Luxembourg) on 23 & 24 September.

The inaugural session of the Infrachain challenge focusses on the Public Sector Blockchain developed by the Ministry for Digitalisation.

Transformative impact of distributed technologies in public services

Easing the adoption of Decentralized Ledger Technologies as drivers for more open, transparent, trusted and efficient Public Services

Token

#trustworthiness #transparency #privacy #efficiency

TOKEN is a project funded by the EU Horizon 2020 programme. TOKEN is an acronym for "Transformative Impact Of BlocKchain tEchnologies iN Public Services". The project is developed by a consortium comprising 11 entities from 8 EU member States, including Infrachain. The total funding allocated to TOKEN is EUR 3,78 mio.

The project aims at developing an experimental ecosystem to enable the adoption of Distributed Ledger Technologies (DLT) as a driver for the transformation of public services towards an open and collaborative government approach. TOKEN focuses on four highly replicable use cases that are commom to many Public Governments across Europe.
