

More than ever, we are in a period marked by uncertainty and change. Every change brings opportunities. The value of ICT for our economies was clearly recognized in 2020. A key characteristic of blockchain is resilience through decentralization. Thanks to this resilience, DLTs will establish as technical backbone of the economy within the next 10 years.

In this edition of the Infrachain newsletter, discover how the projects selected at the Luxembourg Blockchain Lab's call for projects and those presented at Infrachain Summit contribute to make the economy future-proof.

WINNING PROJECTS OF THE LUXEMBOURG BLOCKCHAIN LAB ANNOUNCED

The first call for projects launched by the Luxembourg Blockchain Lab was a huge success as some 25 projects were submitted. After several rounds of evaluation, the selection committee composed of the 5 Lab partners and different ministries delivered its verdict.
